AZOPHARMA PRODUCT DEVELOPMENT GROUP OF COMPANIES:

Azopharma™
Contract Pharmaceutical Services

Integrated product development including synthesis, analysis, formulation and CTM manufacturing for all dosage forms

AVIVOCLIN™
Clinical Services

Human clinical pharmacology and monitoring services for Phase III clinical trials.

AniClin™
PRECLINICAL SERVICES

Preclinical services in support of early product development.

GenScript
The Biology CRO

Your Innovation Partner in Drug Discovery

The pharmaceutical industry is facing unprecedented competitions and challenges. Introduction of new medicines of safety and efficacy to the market is crucial to the growth and success of the business, but the pharmaceutical R&D output has declined in an alarming rate. Imperative challenges consist of shortening target identification and validation process, developing quality assay and screening, improving compound profiling and optimization, increasing success rate while containing cost, and bringing new therapy to market continuously, thus remaining productive and competitive.

GenScript is a leading biology CRO focusing exclusively on early drug discovery and development services. Built on our assembly-line mode, one-stop solution, continuous improvement, and stringent IP protection, GenScript provides a comprehensive portfolio of services that include Bio-Reagent, Bio-Assay, Lead Optimization, and Antibody Drug Development which can be effectively integrated into your value chain and your operations. Headquartered in New Jersey, USA and with a major subsidiary in China, GenScript has over 600 employees, many of them are seasoned R&D scientists from leading western pharmaceutical and biotech companies with extensive experience in advancing drug discovery and development programs. We strive with competence and confidence to meet your demand for developing pre-clinical drug candidates time-efficiently and cost-effectively. With track performance record, GenScript is your ideal and reliable innovation partner in drug discovery.
