Formurex, Inc. is a pharmaceutical contract research organization (CRO) with a mission to provide the best services in Preformulation, Formulation Development, Analytical, Stability and GMP Manufacturing.

- About 8000 sq ft area.
- Well Equipped Formulation Development Labs.
- Sophisticated Analytical and Quality Control (AQC) Labs.
- Safe and Secure Stability Lab.
- Controlled Access GMP Manufacturing Suites for Phase 1 Clinical Supplies and Controlled Substances.
- Spray-Drying Lab.
- Supporting Labs (receiving, quarantine, inventory control)
- 80 equipments under GLP/GMP.
- Access to University of the Pacific for additional equipment needs

**CEO's Statement:** Since its initial operation in the spring of 2006, we have served around 30 clients in the industry. We have formulated small and large molecules (peptide and enzymes) into various dosage forms. We also have helped our clients to successfully increase bioavailability for a number of insoluble drugs (through nano-milling or spray drying). Starting with two employees on limited seed funding, we have since built up a strong team for quality service, and purchased/qualified 100 equipments for analytical QC and formulation development. I believe Formurex will continue to be known as a reliable, innovative, and quality-oriented CRO.
